Erasmus Policy Statement (Overall Strategy)

D. Erasmus Policy Statement (Overall Strategy)

The Institution agrees to publish this overall strategy on its website within one month after the signature of the Erasmus Charter for Higher Education by the European Commission.

Please describe your institution's international (EU and non-EU) strategy. In your description please explain a) how you choose your partners, b) in which geographical area(s) and c) the most important objectives and target groups of your mobility activities (with regard to staff and students in first, second and third cycles, including study and training, and short cycles). If applicable, also explain how your institution participates in the development of double/multiple/joint degrees. (max. 5000 characters)

Translation language [EN]

ITS "Energy and Environment" is an Higher School in field of the Energy and Environment and its particular area of interest is Energy Efficiency. ITS is a Foundation formed by 30 member such as secondary schools, universities, private companies and local authorities to give life to an innovative educational system that assure a real integration between Education, Training and Labour Market.

ITS provides courses a postsecondary educational high-level for the management and verification of energy systems. ITS is analogous to University, but the relationship with the companies is nearer, the duration is shorter than an university course and it is fundamental the laboratory activity.

Training area has main basic topics on Energy Efficiency, Renewable Energy Sources, Climate and the Environment and New Technologies.

The aims of ITS is to:

- Realize two-year courses, preparing high-level technician able to expand innovation technology toward SMEs
- Achieve a real integration between education, training and labour market
- diffuse the technical and scientific knowledge and understanding
- counselling and guidance for student to effort 'green job'
- produce technician to attain a high level of personal and professional achievement and prepared for high-skill occupations.

ITS aims are to foster his cooperative relationship to develop and improve the system of technical education, to increase educational activities quality, to extend professional opportunity for its students, teachers and administrative staff. To this aim will be achieved thanks to training plans and training for students (incoming and outgoing) and to the teaching staff in collaboration with higher education institutions in other countries that perform similar courses
